SUMMARY

Power BI developer with nearly **3 years of hands-on experience** designing, developing, and maintaining **interactive dashboards and reports using Microsoft Power BI**. Strong expertise in **data modeling, relationships, and DAX measures**, along with end-to-end **ETL processes** across multiple data sources including databases, Excel, and APIs. Proven ability to **optimize report performance**, manage **incremental data refreshes**, and build **reusable datasets, dataflows, and semantic models** to support scalable reporting solutions. Experienced in **requirements gathering**, translating business needs into actionable dashboards, **implementing row-level security** (RLS), and **managing deployments via Power BI Service**. Adept at troubleshooting data and refreshing issues, ensuring data accuracy and consistency, collaborating with data engineering teams, and maintaining comprehensive documentation to support BI standardization and adoption.

TECHNICAL SKILLS

Microsoft Power BI: Power BI, Azure Analytics Platform, Power BI Service Administration, Power Query, DAX (Measures, Calculated Columns), KPIs / KRIs / OKRs, Power Query Editor, Data Modeling, Row-Level Security (RLS), Performance Analyzer, Workspaces, Deployment Pipelines, Governance & Documentation

Data Analytics: Data Visualization, Data Modeling, Data Transformation, Advanced Excel (analysis, scenario evaluation, reporting), Data Quality & Validation

Data Platforms: Azure Data Factory, Databricks, Matillion DPC, Power Automate, Snowflake, PostgreSQL, MySQL, Oracle, Python (pandas, NumPy, REST API)

Delivery & Collaboration: Agile Methodology, Agile Ceremonies, Analytics Module Ownership within Cross-Functional Teams, Insight Synthesis, & Storytelling

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions – Reporting Data Analyst
Sep 2023 - Present | Kolkata, WB

- Designed, developed, and maintained **90+ Power BI data models, reports, dashboards, and visualizations, using calculated measures and DAX inside Power BI** across multiple business domains, partnering closely with business stakeholders to define objectives, success metrics, and analytical scope.
- Performed data extraction, transformation, and loading (ETL)** from multiple data sources such as **Oracle**, PostgreSQL, Excel, and web APIs into cloud data warehouses and data lakes – Snowflake and Azure Data Lake via data pipelines and data flows.
- Optimized report and dataset performance**, server timings, query load time through query-folding improvements, relationship tuning, and model simplification, resulting in improvements of **refresh rate and scalability by ~30%**.
- Built **enterprise-scale analytical data models** using SQL and Python by integrating **10+ heterogeneous data sources** (Oracle, PostgreSQL, ServiceNow, SharePoint, Azure DevOps).
- Created reusable certified, promoted, and master datasets**, dataflows, and semantic models for cross domain reporting solutions. Developed Power BI **DataMart** to enable fully managed, self-service Azure SQL databases that enable users to ingest, transform, and store data, automatically generating a semantic model for reporting with centralized **row-level security (RLS)** in Power BI Services.
- Worked closely with business stakeholders** to deliver **recurring and ad-hoc analyses** under tight timelines in a fast-paced, service-oriented environment, adapting outputs based on iterative stakeholder feedback. Supported leadership discussions by enabling **data-driven decision making** and prioritization across business functions through standardized KPIs and comparative analysis.
- Implemented row-level security (RLS)** and managed environment-wise workspace access to business analysts and stakeholders, implemented schedule refresh and managed report deployments through **Azure DevOps CI/CD pipelines** within Power BI Services.
- Automated manual reporting processes**, contributing to a **~90% reduction in manual reporting effort** and improving data availability and reliability for decision-makers through Power Apps and Power Automate to send automated reports, implement schedule refresh, and custom notifications to business.
- Communicated business insights through PPT slides**, Lucid charts to consumers by collecting, synthesizing, and applying **hypothesis-driven analysis** on dimensional modeling (star/snowflake schemas) to support operational efficiency, service performance, and analytics use cases.
- Collaborated with data engineers and database teams** to ensure data quality, accuracy, and alignment of analytical outputs with **enterprise Data & Generative AI frameworks** using audit and validation scripts across each report and set up alerts using Power Automate.
- Established analytics documentation standards** and reusable frameworks, for Power BI reports, dashboards, and semantic data models contributing to improved delivery consistency and **reducing onboarding and maintenance effort by ~60%**.

PROJECTS

ServiceNow ITSM Management Dashboard [[Link](#)] | **Power BI, DAX, Power Query, Snowflake, Azure DevOps**

- Consolidated **200M+ records across 8 ITSM datasets** as a combination of Fact and Dimension tables into a centralized Snowflake warehouse to address disconnected reporting and limited visibility into business insights.
- Authored a **star-schema analytical model** and standardized KPIs (SLA adherence, MTTR, incident aging) to enable consistent, cross-functional performance measurement.
- Executed ETL, data preparation, and performance-optimized modeling using **SQL and Power BI**, delivering executive and operational analytics views.
- Enabled real-time service performance insights, **reducing manual reporting effort by ~90%** and supporting faster operational decision-making.

CRM Sales Performance Analytics [[Link](#)] | **Power BI, SQL, Excel**

- Introduced a high-performance star-schema model to improve visibility into pipeline health and applied hypothesis-driven analysis to evaluate deal aging and inventory exposure, identifying stalled opportunities.
- Performed RFM-Analysis and delivered analytics solution that identified **\$26K+ in stagnant capital**, enabling targeted corrective measures by sales leadership.

EDUCATION

Bachelor of Technology (B. Tech) 2019 - 2023
B.P. Poddar Institute of Management and Technology, Kolkata, India
CGPA: 9.15 / 10

PROFESSIONAL SKILLS

- Fluent English Communication (CEFR C1)
- Analytical Problem Solving & Critical Thinking
- Responsibility & Accountability
- Adaptability
- Stakeholder Collaboration
- Attention to Detail & Quality Focus
- Time Management & Prioritization

CERTIFICATION & COURSEWORK

- Snowflake – The Complete Masterclass - Udemy
- Learn SQL using MySQL and Database Design – Udemy
- Data Analysis with Python: NumPy & Pandas Masterclass – Udemy
- Microsoft Excel Data Analysis and Dashboard Reporting - Udemy
- PL-300 Certification: Power BI Data Analyst - In Progress
